Team:

Please get any comments/concerns you have on the revised parking study areas attached to this email by the close of business Monday. If I do not hear from you, I will assume there are no objections. It is critical that we respond as soon as possible so the project team stays on track for collecting the on-site data in the Spring. Missing that target date could set us back several months.

The changes in the study areas were based upon feedback from the surveys, approximately 650 received, and further discussion among the project study team.

Also attached to this document is the parking study survey summary study and analysis to provide you with additional details should you be interested.

Thanks for your assistance.

PAUL BACKSTROM

Hi All -

Attached please find a revised version of the Westside Mobility Plan parking study area map.

This version reflects the comments at the Working Group meeting on March 2, as follows:

- Extend the National commercial corridor west to Mentone.
- Change the portion of Lincoln south of Washington to Culver to be a commercial corridor instead of a study district. The northern portion from Washington to the Santa Monica city line would remain a district.
- Extend the Abbott Kinney district south to Washington.
- Change the designation of Loyola Village area to be a commercial corridor instead of a district, and change the designation of the Westchester business district to be a district instead of a commercial corridor.

Please let us know ASAP if you have any comments on the attached, or whether we can consider it finalized, as we are proceeding with developing the parking data collection plan based on these districts and corridors. Thanks!

- Tom
